Business Process update to Assign Roles – view two new columns

1. Navigate to worker profile.
2. Within Related Actions, access Security Profiles, then Assign Roles. Then you’ll have the option to Add/Remove.
3. Input effective date.
4. Add/Remove role(s).
5. Submit

There are two new columns to view

Role Assignees as of Specified Effective Date shows all who have been assigned the specified role as of the selected date at the specified organization.

Role Assignments as of Assignee Effective From Date show all historical instances of role assignments or removals at the specified organization.
